

MARKETING AUTOMATION FOR NETSUITE CRM

The single most important criteria for sales and marketing success is the alignment of the two teams. To facilitate the alignment, it is essential to integrate marketing automation with NetSuite CRM. Without this integration, too much time and too many resources will be drained and leads will leak out of the funnel.

Salesfusion is a marketing automation platform that has a two-way integration with NetSuite CRM and is installed out-of-the-box with no middleware. The integration is unique in the industry in that it provides a native integration in both on-premise and hosted environments.
